ON THE COVER — Family cabin resorts, typified by this scene at Eagle Bay Lodge near Park Rapids, Minnesota, have traditionally provided a touch of nature and outdoor recreation for residents and visitors to the state. But they are in many cases marginal economically, according to a paper published in this issue of the *Journal*. A main problem, the study says, is that many of the resorts are of small capacity, unlike Eagle Bay Lodge, which is among the largest such enterprises with 29 units.

---

The Minnesota Academy of Science does not take a stand on issues which may be discussed in articles published in the *Journal*. Readers should bear in mind that views expressed in these articles are strictly those of the authors.
